

# IGSN - SYMPOSIUM

Monday, November 2<sup>nd</sup> 2015 • 15.00 (3 pm)

FNO – 01 / 117

## Cellular dynamics underlying functions of medial temporal lobe

15:00

**MARTA MOITA**

Champalimaud Foundation Research - Neuroscience, Lisboa, Portugal

**The role of the amygdala in the modulation of defence behaviours by the social environment**

16:00

**FRANCESCO P. BATTAGLIA**

"Neuronal Networks of Memory" group, Donders Centre for Neuroscience, Radboud University, Nijmegen, NL

**Detection of cell assemblies and phase sequences during memory replay**

17:00

Coffee break

17:15

**STEFAN REMY**

Neuronal Networks Group, German Centre for Neurodegenerative Diseases in the Helmholtz Foundation e.V. (DZNE e.V.) / Department of Epileptology, University of Bonn. Germany

**Subcortical circuits controlling locomotor activity and hippocampal function**

**Host:**

MOTOHARU YOSHIDA

Neural Dynamics Lab, Faculty of Psychology, Ruhr University Bochum

**Guests are welcome!**
